Lysicare

(High Quality L-Lysine for Poultry)

Lysine is an essential amino acid and a crucial building block for proteins in poultry. Since birds cannot synthesize it naturally, it must be provided in their feed. Supplementing with L-Lysine supports optimal muscle development, feather growth, enhanced egg production, and better feed conversion ratios.

How it works :

Cells use lysine to build body protein and it is especially important for

- Muscle growth
- Breast meat development
- Feather formation
- Organ development
- Egg protein production

Composition : L-Lysine 99%

Benefits :

- Lysine is one of the most important amino acids in poultry nutrition, especially for broiler chickens and laying hens.
- Faster growth in broilers
- Better feed conversion ratio (FCR)
- Improved meat quality
- Higher egg production in layers
- Better feather development
- Supports immunity and health

Target birds : Broiler, Layer and breeder

Dosages : 500 gms per ton of feed

Pack size : 500 gms, 1000 gms & 25 kgs
